## Welcome – Pseudomyxoma Peritonei (PMP) Community

### WHAT IS PSEUDOMYXOMA PERITONEI (PMP) ?

Known as PMP, pseudomyxoma peritonei is a rare cancer that generally starts in the appendix. More rarely, it can start in other parts of the bowel, the ovary or bladder and is thought to affect between one and two people per million per year, of all ages, both men and women.

# PMP community on RareConnect

[Check out the map here](#)

- Founded: **April 2014**
- Total membership: **100**
- Members from: USA, Canada, Peru, Brazil, Israel, Spain, Germany, Holland, Belgium, Ireland, UK, Switzerland, Qatar, Australia, Italy

# Why be involved in RareConnect?

- **Human translation** across 8 languages means we can build an internationally active movement where everyone has access to information
- **Moderation** by EURORDIS, Pseudomyxoma Survivor
- Help gain insight into **international issues** faced by people living with PMP

# Agenda for Today

- I. Michael Healy, Pseudomyxoma Survivor, Introduction
- II. Dr. Wim Ceelen - "Diagnosis/staging, surgery, and postoperative quality of life"
- III. Dr. Faheez Mohammed – ""Pathology, surveillance and managing recurrence of PMP""
- IV. Questions and Wrap up
